PROFILE

M.Sc. Electrical and Embedded Systems student at Ravensburg-Weingarten University of Applied Sciences (RWU) with a B.E. and Diploma in **Instrumentation Technology** and **4+ years of combined industry, internship and lab experience** in **embedded systems development, sensor interfacing, PCB design & testing, HMI programming and IoT**. Hands-on with **STM32, Espressif (ESP), Arduino and Raspberry Pi** in **Embedded C/C++ and MicroPython**. As a **Design Engineer**, delivered the **HMI for an IIT Bombay hydrogen-based solar induction system** (sensor wiring, parameter monitoring, warning system) and performed **hardware debugging of an RTD-based temperature controller**. Ran a university prototyping lab (**3D printers, laser cutter, robotic arm**) and designed parts in **FreeCAD/AutoCAD**. Winner of a national-level technical competition (1st prize). Seeking a **Working Student** / **Internship** position in Embedded Systems, Hardware Development, Automation or PCB Design.

EDUCATION

Sep. 2025 – present **M.Sc. Electrical and Embedded Systems (EMM)**
Ravensburg-Weingarten University of Applied Sciences (RWU), Germany | Focus: Embedded Systems

Oct. 2021 – Jun. 2024 **B.E. Instrumentation Technology** | *VESIT, University of Mumbai, India*
Focus: Instrumentation, FPGA Prototyping | Workshops: PCB Design, 8051, 3D Printing

2019 – 2021 **Diploma, Instrumentation Technology** | *VES Polytechnic, Mumbai, India – First Class*
Skills: Autodesk Tinkercad, AutoCAD

EXPERIENCE

Apr. 2024 – Aug. 2025 **Design Engineer** | *Ideation Instruments, Navi Mumbai, India*

- **HMI Programming**: Developed the **HMI for a hydrogen-based solar induction system (IIT Bombay)**; wired all **sensor connections per wiring diagrams**; built the interface to operate and **monitor system parameters**, incl. a **warning system** to prevent equipment damage.
- **Testing & Debugging**: **Hardware testing and debugging** of an **RTD-based temperature controller**.
- **CAD & PCB Design**: Flat-pattern drawings in **FreeCAD** for fabrication; contributed to the design of educational kits and **PCB layouts**.

Sep. 2023 – Mar. 2024 **Product Engineer (Internship)** | *Ideation Instruments, Navi Mumbai, India (Hybrid)*

- **PCB testing** and module-based product design; **reliability and quality testing** to ensure product performance; hands-on with **STM32** and **Espressif (ESP)** controllers.

Aug. 2023 – Jan. 2024 **IoT Developer (Internship)** | *Skill Bahn LLP, Thane, India*

- Built tailored **IoT solutions** for educational applications in a startup; electronics and **embedded systems design, testing and deployment** with cross-functional teams.

Jan. 2022 – Dec. 2023 **Embedded Systems Developer (Part-time)** | *Maximus Robotics-Pro, Thane, India*

- Developed educational **robotic solutions**; improved **data acquisition** for various sensors; created **custom drivers for Blockly-based programming** of four-wheeled robots; contributed to syllabi and structured projects.

Dec. 2021 – May 2024 **Lab Coordinator, Tinkerers Lab** | *ISA-VESIT, Mumbai, India*

- Managed and maintained **3D printers, a laser cutting machine and a robotic arm**; supported students in machine operation, **troubleshooting and rapid prototyping** from concept to working hardware.

Mar. 2019 – Sep. 2019 **In-Plant Trainee** | *Air India Engineering Services Ltd., Mumbai, India*

- Assisted licensed engineers with **maintenance checks** on cabin and In-Flight Entertainment (IFE) systems (Boeing 747, 777, 787, 737NG) in line with **regulatory and safety requirements**.

PROJECTS

AI / Software **CardioSense AI – Cardiovascular Risk Prediction Web App** | *GitHub*

- **Python/Flask** web app predicting heart-disease risk from manual input or an uploaded blood report; **Random Forest (scikit-learn)** trained on 68,581 cleaned records – **73.3% accuracy** (precision 0.76, F1 0.73).
- **OCR data extraction** (Tesseract, pdfplumber) with unit conversion and user confirmation; secure login (hashed passwords), **SQLite** history, **ReportLab** PDF reports, installable responsive PWA; Git/GitHub.

Sensor / Measurement **PrecisionForce – Load Cell-based Force Measurement**

- Interfaced a **load cell** with a microcontroller for **calibrated, accurate force measurement**, applicable to material testing and product design.

IoT / Automation **Demonstration Kit for an IoT-enabled Smart Home**

- **Home automation** kit with IR remote and **Wi-Fi control via Blynk**; temperature/humidity monitoring on a Blynk dashboard.

Embedded Software **MicroPython Algorithm-Based Block Programming (Blockly)**

- Blockly drag-and-drop interface generating **MicroPython** code for sensors and motors; tested on **Arduino and Raspberry Pi**.

Automation / Robotics **Decoding the Working Principle of Absolute Encoders**

- Studied encoder construction and **communication protocols**; built a demo **decoding shaft position via a microcontroller**.

Sensor Interfacing **Soil Moisture Sensor Interfacing with Arduino**

- Probe sensor with **Arduino Uno** and low/high **alarm system** to support irrigation decisions.

Competition Project **Surveillance 2-DOF Helicopter with Mounted RC Car** | *S.P.I.T. Innovation Cup-23*

- Contributed to a surveillance **2-DOF helicopter** with a mounted RC car for military purposes; reached Evaluation Round 2.

CORE SKILLS

- **Embedded & Microcontrollers:** STM32, Espressif (ESP), Arduino, Raspberry Pi, 8051, FPGA prototyping; sensor interfacing; data acquisition.
- **Programming & Tools:** Embedded C/C++, Python, MicroPython, Blockly, HMI programming, Blynk IoT, Git/GitHub, Linux/Ubuntu.
- **Software & AI:** Flask, scikit-learn (Random Forest), pandas, NumPy, Tesseract OCR, SQLite, HTML/CSS/JavaScript, Jupyter.
- **Hardware Design & Testing:** PCB design and testing; hardware debugging; reliability/quality testing; RTD temperature control; load cell calibration; instrumentation; wiring diagrams.
- **CAD & Fabrication:** FreeCAD, AutoCAD, Autodesk Tinkercad (3D modelling); 3D printing; laser cutting; robotic arm operation.

CERTIFICATIONS & AWARDS

- **Competitions: 1st Prize – Robothon Technical Competition** (B.K. Birla College, Kalyan, Jan. 2023), IoT-based home automation system | S.P.I.T. Innovation Cup-23 – Evaluation Round 2 (AICTE-SPICES & AICTE IDEA Lab sponsored; ESA, IEEE, Apr. 2023).
- **Leadership & Volunteering:** Lab Coordinator, Tinkerers Lab ISA-VESIT | Volunteer, With Them For Them – Adarsh Foundation, Kurla (30 hours, 2022–2024).

LANGUAGES & INTERESTS

Languages: English (professional working proficiency) | German (A2, actively learning).

Interests: Embedded systems and IoT | Sensor interfacing and instrumentation | PCB design and rapid prototyping | Automation and robotics.

Ravensburg, October 17, 2026
